

# WATER COOLERS & BOILERS

A diverse range, designed to meet the needs of a wide cross section of industry sectors. Installed by our own in house engineer team, we specialise in bespoke installations otherwise avoided by the competition. Mains Fed units bring the convenience of never running out of water, filtered fresh tasting water, a reduced carbon footprint without the need for delivery vehicles, no health & safety issues lifting heavy bottles and significant cost savings against the bottled alternative.

- We specialise in providing point of use mains fed water solutions
- Selected range of units that are designed to meet the needs of a variety of business sectors
- Water coolers provide your business with hydration which promotes better health for your employees
- Clean filtered chilled water that can improve the image of your business
